Modernize your Lubricant Storage and Handling Practices

Lubrication storage, handling, and dispensing is often overlooked, but it is critical to a successful maintenance program. Correct storage and handling can lead to real savings. The return on investment, often referred to as ROI, can be immediate with reduced equipment failures leading to increased production up-time. In fact, a few quick changes in your lube program can lead to improved work areas, safer conditions, cleaner lubricants, lower equipment maintenance cost, improved production, and more.

This brochure is designed to give you direction to get on the road to a world class lube room. Whether you have 3 lubricants or 30 - these tools will help guide you on your way. Does this guide contain everything you need to know, of course not, but it can definitely put you on the path to success.
Fix Old Habits and Move to a World Class Lube Room

The above pictures show some of the ‘old ways’ of storing lubricants. Often times lubrication took a back seat but not anymore. Companies are realizing the massive savings in both time and money to proper lubricant storage. In addition, an unmanaged and messy lube room can lead to insurance issues and dangerous conditions. The bulk systems offered can lead to a world class lube room and a better workplace.
MODERNIZE LUBRICANT STORAGE AND HANDLING PRACTICES

Oil Safe Bulk Systems are the most feature rich and highest quality lubricant storage and dispensing systems available. Perfect for any workplace looking to instantly establish best practice by quickly ridding itself of old bulk oil storage equipment and processes. An Oil Safe bulk storage system will enable you to take immediate control over your lubrication workflow process and get your lubricant storage areas and practices clean, efficient, and compliant.

The two main systems; Advanced and Lubrication Work Center become the main focus of any updated world class lube room. Each can be configured to meet your specific workplace requirements. Additional secondary systems are available to supplement lube management either in the field or in other areas of the workplace. Whether you need lube management help in the field with a Quad Con System or a remote part of the warehouse with a Drum Work Station - world class lube management is within reach.

ESTABLISH BEST PRACTICE

• Lubrication Reliability (5R’s)
• LEAN Manufacturing
• Workplace Organization (5S)
• Environmental Compliance (SPCC)
• Safety Compliance (OSHA - Right to Know)

Tanks - Mix and match different tanks and colors to meet your needs
Custom Labeling - Add the optional labeling feature to receive fully integrated customized identification labeling for additional compliance
Fluid Cleanliness - Minimize lubricant contamination
Compliance - Features available to meet facility compliance
Spill Control - Multi-Tier spill control
Modular Heavy Duty Construction - With a fully welded and powder coated steel frame it is durable and also ships in pre-assembled modules
Features - Rich in features and options to maximize budget and functionality
SYSTEM FEATURES

- Color Coded - Choice of 10 different colors for identification
- Tank Sizes - Choose from 30, 65, 120, 240 gallon tanks
- Fire Safety - Systems come with MSHA CFR30 rated hosing and have the option to include auto-shut off tank isolation valves
- OSHA - Right to know with color coded and labeled tanks and taps to ensure accurate fluid identification and handling
- EPA SPCC - Systems come standard with integrated spill containment
- Ships Assembled - Save time with preassembled modules that are virtually ready to use within minutes
- Clean, Safe, and Professional - Restores pride and in the work place and helps with facility inspections
- Lube Storage - Accommodates lubricants up to ISO 680
- Various Configuration - Scale the system to accommodate the number and volume of storage and dispensing

FLUID CLEANLINESS

- In-Line Filtration
- Desiccant Breather - Dedicated breather for each tank to remove airborne contaminants and moisture
- Dispense - High quality auto-shut off taps
- Filling - Dedicated suction hoses on the Advance and Work Center Systems
- Cleaner Fluid - Dedicated pump and filter on each tank on the Advance and Work Center Systems
- Filtration - With the Advance and Work Center it filters when you fill, dispense and you can also recirculate it (kidney loop)

GENERAL FEATURES

- Integrated Pallets - Integrated lift points built into the systems for easy forklift and hand truck transportation
- Gauges - Top mounted gauges for easy and safe viewing of tank fill level
- Grounding - Retractable cable reel grounding kit and system earth lugs to mitigate static electricity build up
- Lubricant Flexibility - Suitable for storing machinery lubricating oils and glycol based lubricants
- Drip Trays - Removable stainless steel drip trays collect spills that may occur when filling dispensing containers
- Power - All systems come standard with 110v single phase TEFC motors; air pneumatic option available

The Oil Safe Work Center Bulk Storage System is like an instant lube room. The color coded central dispensing station makes filling with the right lubricant a snap. There is a storage cabinet below the dispensing station or if you upgrade to hose reels they are conveniently stored inside. Features color coding, pressurized dispensing taps, built in spill containment, and a separate pump/filter for each tank providing 3 way filtration (filters while filling, recirculate (kidney loop), and dispensing). Comes standard with a 25 micron Beta 2000 filter, other ratings available. Ships assembled and virtually ready to use.

- Dedicated Pump and Filter per tank - This helps prevent cross contamination.
- Electrical Protection - Circuit breakers, surge protectors, and motor overload protection.
- Spill Containment - built in spill containment for work place safety and SPCC compliance.
- Three way filtration.
- Ergonomic Dispensing Station - Dedicated dispensing station with work surfaces and storage.
- Heavy Duty Tanks - Tanks available in 10 colors and 4 sizes; 30, 65, 120, and 240 gallon.
- Pre-Assembled - Get up and running quickly without spending a couple of days chasing down tools and parts building a system.
- Compact Footprint - Each pod is 46” wide x 46” deep x 88” tall.

Tip: You can't go wrong with the Advance or Work Center but the WC has the option of having the dispensing station located away from the tanks. For example, the dispensing station can be in one room but the tanks can be in the next room. Additional cost may apply.

The ultimate in lubrication management.
Configuration: 4 x 65 Gallon  
Part Number: FF30400

Configuration: 4 x 30 & 2 x 65 Gallon  
Part Number: FF34200

Configuration: 4 x 120 Gallon  
Part Number: FF30040

Configuration: 6 x 65 Gallon

Part Number: FF30041

Configuration: 12 x 65 Gallon  
Part Number: FF30C00

Or Mix and Match - Build Your Own System

Mix and match different size tanks and create a system that matches your application. Choose from 30 gal, 65 gal, 120 gal, or 240 gallon tanks. Just tell us the number of tanks and sizes and we will create it just for you.
The Oil Safe Advanced Bulk Storage System can easily get you up to speed with best practices. This space efficient design features color coding, pressurized dispensing taps, built in spill containment, and a separate pump/filter for each tank providing 3 way filtration (filters while filling, recirculate (kidney loop), and dispensing). Comes standard with a 25 micron Beta 2000 filter, other ratings available. Ships assembled and virtually ready to use - just screw on the taps and the drip tray, plug it in and you have a best practice storage system.

- Dedicated Pump and Filter per tank - This helps prevent cross contamination.
- Spill Containment - built in spill containment for work place safety and SPCC compliance.
- Three way filtration.
- Heavy Duty Tanks - Aluminized steel tanks available in 10 colors and 4 sizes; 30, 65, 120, and 240 gallon.
- Pre-Assembled - Get up and running quickly without spending a couple of days chasing down tools and parts building a system.
- Compact Footprint - Each pod is 46” wide x 61” deep x 88” tall.

Quad Con System
Instant lubrication management on the base, in the field, or on location.

The Oil Safe Quad Con Advanced Bulk Storage System offers an instant best practice lubrication management on the base, in the field, or on location. This space efficient Quad Con design features color coding, pressurized and gravity dispensing taps, built in spill containment, and a separate pump/filter for each tank providing 3 way filtration (filters while filling, recirculate (kidney loop), and dispensing). Comes standard with a 25 micron Beta 2000 filter, other ratings available. Available in electric or pneumatic versions with or without the Quad Con container. Ships assembled and virtually ready to use.

- Dedicated Pump and Filter per tank - This helps prevent cross contamination.
- Spill Containment - built in spill containment for workplace safety and SPCC compliance.
- Three way filtration.
- Heavy Duty Tanks - 12 gauge steel tanks available in 10 colors and 3 sizes; 30, 65, and 120 gallon.
- Pre-Assembled - Get up and running quickly without spending a couple of days chasing down tools and parts building a system.
- Compact Design - Each pod is 45” wide x 87” deep x 69.5” tall.

The Oil Safe 55 Gallon Drum Work Station delivers best practice contamination control for 55 gallon drums in a space efficient form. This space efficient design features a stainless steel dispensing console and drop pan, pressurized dispensing tap, dedicated suction hose, and a pump/filter providing 2 way filtration (filters while dispensing and recirculate (kidney loop). Comes standard with a 25 micron Beta 2000 filter, other ratings available. Ships assembled and ready to use.

- Dedicated stainless/PVC suction spear/hose for drum with cam coupler.
- Positive displacement gear pump with internal bypass.
- Two way filtration.
- Delivered pre-assembled and ready to use.
- Electronic stop/start buttons.
- Compact Footprint - 14” wide x 24” deep x 65” tall.
- Drum can be placed on a drum deck or spill pallet for SPCC spill containment if required.
- Available as electric or pneumatic.

The Oil Safe Tote Dispensing Rack delivers best practice contamination control for common 300 gallon totes. This space efficient design lifts the tote off the ground for easy dispensing. Features retractable hose dispensing reel (25 feet) with trigger dispenser. Comes standard with a 25 micron Beta 2000 filter, other ratings available. Ships assembled and virtually ready to use - just attach the tote and connect hose (hose adapter may be necessary, available from the tote supplier), plug it in and you have a best practice dispensing rack.

- Positive displacement gear pump with internal bypass.
- Spill Containment - built in 75 gallon spill containment, additional spill pans available to expand spill capacity for SPCC compliance.
- Fits common totes.
- Heavy duty rack designed to accommodate totes with base dimensions less than 41”w x 46”d.
- Pre-Assembled.
- Available in electric and pneumatic.
- Compact Footprint - Each pod is 46” wide x 46”deep.

The Oil Safe Bulk Transfer Skid give operations bulk fluid mobility in a safe and rugged form. Available in two tanks sizes of 120 and 240 gallons, it offers facilities a way to manage larger amounts of fluid with integrated fork lift pockets. Dispense with the hose reel to transfer containers, fluid carts, or directly into nearby equipment. Comes standard with a 25 micron Beta 2000 filter, other ratings available. Ships assembled.

- 25ft Hose Dispensing Reel with high flow dispensing gun; Metering gun upgrade available.
- Spill Containment - built in spill containment for work place safety.
- Three way filtration. Filters while filling (if not using bulk fill port), recirculate, and dispensing.
- Heavy Duty Tanks - Aluminized tank available in 10 colors and 2 sizes; 120 and 240 gallons.
- Pre-Assembled - Get up and running quickly without spending a couple of days chasing down tools and parts building a system.
- Compact Footprint - Each pod is 46” wide x 46”deep.

The Oil Safe Advance Fluid Handling Cart offers mobile best practices. This cart offers mobile storage of fluids in addition to fluid transfer and off-line filtration. Features color coding, 25ft dispensing hose reel, built in spill containment, and a pump/filter providing 4 way filtration (filters while filling, recirculate (kidney loop), dispensing, and off-line). Comes standard with a 25 micron Beta 2000 filter, other ratings available. Integrated forklift pockets and available with air or electric pumps. Ships assembled.

- 25ft Hose Dispensing Reel with high flow dispensing gun; Metering gun upgrade available.
- Spill Containment - built in spill containment for work place safety and SPCC compliance.
- Four way filtration.
- Heavy Duty Tank - 65 Gallon aluminized steel tank available in 10 colors.
- Pre-Assembled - Get up and running quickly without spending a couple of days chasing down tools and parts building a system.
- Compact Footprint.

890151 Storage Cabinet with Integrated Spill Containment
(Link pods together for extra containment capacity)

Hose Rack
After emptying drums, totes, or pails, the suction hoses for the Advance and Work Centers can be stored in the Mobile Hose Cart, on Wall Mounted Rack, or if space permits on the side of your system with a Frame Mount Rack.
895004 Mobile Suction Hose Cart, 4 Hose
895006 Mobile Suction Hose Cart, 6 Hose
895008 Mobile Suction Hose Cart, 8 Hose
895010 Mobile Suction Hose Cart, 10 Hose
895012 Mobile Suction Hose Cart, 12 Hose
895104 Wall Mount Suction Hose Rack, 4 Hose
895106 Wall Mount Suction Hose Rack, 6 Hose
895108 Wall Mount Suction Hose Rack, 8 Hose
895204 Frame Mount Suction Hose Rack, 4 Hose
895206 Frame Mount Suction Hose Rack, 6 Hose
895208 Frame Mount Suction Hose Rack, 8 Hose

Remote LED Display
Remote LED level display that accurately and reliably measures the level in your tank. It will transmit and display the level information to the wired LED display that you can put virtually anywhere. Features colored LEDs, 25ft cord, hi/lo level alarms. Powered by 9v battery (not included).
Part Number : FFRLD01

Tank Overfill Alarm
Direct mount tank overfill alarm fits easily to tank level gauges and can be supplied with your system or retrofitted to an existing system. Features audible alarm, flashing light, reset, powered by 9 volt lithium battery (supplied), and test switch.
Part Number : 897102

Spill Containment Kit
Increase system spill containment for additional protection of SPCC compliance.
821352 Connector Kit, 2 Frame
821353 Connector Kit, 3 Frame
821354 Connector Kit, 4 Frame
821355 Connector Kit, 5 Frame
821356 Connector Kit, 6 Frame

Filter
Premium high quality Beta 2000 micro glass replacement bulk system filters provide maximum particle holding capacity and efficient operation.
469962 Filter Element OSF4 B2000 - 4um
469964 Filter Element OSF7 B2000 - 7um
469966 Filter Element OSF25 B2000 - 25um

Breather
Replacement desiccant breather to help prevent moisture and airborne contaminants from entering tank.
Part Number : Z134
**Hose Reel**
Retractable hose reels with trigger operated dispensing nozzles. A 3/4” diameter hose is available in 25 ft length allowing dispensing to lubricant carts, containers, or equipment.

Part Number: 8Z0225 Hose Reel, 25 ft

Upgrade available only with Lubrication Work Center.
25ft Hose Reel standard on Tote Dispensing Rack, Bulk Transfer Skid, and Advanced Fluid Cart.

**Digital Metering Gun**
Digital metering gun with nozzle and rigid spout provide instant and accurate measurement of dispensing volume.

Part Number: 821251

Available for the Lubrication Work Center, Tote Dispensing Rack, Bulk Fluid Skid, and Advanced Fluid Handling Cart.

**Fire Safety Upgrade**
The Fire Safety Upgrade helps to protect the facility in the event of a fire by preventing the tank from draining with a fusible link.

8Z0101 Advanced & Work Center Protection
Includes fusible link (165°F) auto-shut off tank isolation valves. Order (1) upgrade for each tank on your system.

**Custom ID Labeling**
Customized identification labeling upgrades are available for the bulk systems to assist with no mistake application for OSHA Right to Know compliance and NFPA.

Part Number: 8Z0300
For nearly two decades, the Oil Safe System has been the oil transfer management system preferred by leading companies around the world.

People often go to great lengths to preserve the quality of their oil only to contaminate it by using filthy containers, pouring it through a dirty funnel, or inadvertently mixing it with different oil.

The Oil Safe system is a fully sealing unit that prevents contaminants from getting into the oil. The pour spouts available make dispensing quick and easy and with 10 different colors help prevent cross contamination.

Available in 10 Colors

- Beige
- Black
- Blue
- Dark Green
- Grey
- Mid Green
- Orange
- Purple
- Red
- Yellow

Oil Safe down-stroke pump delivers 1 liter with approximately 12 strokes

Fully interchangeable drums and lids, any style lid works with any size drum

See through drums with graduated markings in both liter and US quarts make it easy to see and measure levels

Bright colors make Oil Safe dispensers easy to find and easy to color code lubricants

Quick twist spout is easy to open and close. Controls flow and keeps dirt out

Push button auto shutoff air intake enables smooth pouring of lubricants

Robust lid design for easier handling

WARNING: Not suitable for fuels or solvents.
### Lube Containers

#### Mini Spout Lid
With an outlet diameter of approximately .25" (7mm), this spout is ideal for lubrication jobs where equipment filler holes are small. The narrow spout is perfect for precise filling.

Don’t use old containers to transport fluid to any equipment. It quickly introduces contamination.

Funnels are susceptible to dirt and dust in addition to cross contamination. Use the ForFluids Oil Safe containers and if you have to use a funnel, use a disposable paper funnel.

Don’t store drums where dust and dirt can collect on top or in locations where they can collect rain water.

Fix Old Habits

Double violation:
Don’t store drums where dust and dirt can collect on top or in locations where they can collect rain water.

Open air transfer containers introduce moisture, dust, and dirt to your fluids. Use a closed transfer container assigned only to one fluid.

Just don’t do this:
Open air transfer containers introduce moisture, dust, and dirt to your fluids. Use a closed transfer container assigned only to one fluid.
**Pistol Grip Grease Gun**
This heavy duty grease gun is ideal for one handed operation and designed for use in confined spaces.

- 3-way packable (suction, cartridge, filler pump)
- Super strong pistol grip handle with rubber tip
- Design prevents fingers from pinching
- Includes both 4” steel and 12” flexible extensions

Clear grease guns are made of impact resistant polycarbonate and are designed for industrial environments.

**Lever Grease Gun**
Variable stroke lever action for greater control of delivery. Designed for industrial day to day applications.

- 3-way packable (suction, cartridge, filler pump)
- Rubber grip for non-slip operation
- Includes both 6” steel and 12” flexible extensions

Clear grease guns are made of impact resistant polycarbonate and are designed for industrial environments.

**Grease Fitting Identification/Protector**
These grease fitting protectors deliver a secure seal over most common grease fittings providing excellent protection against contamination. Additionally, with 10 colors, fittings can be quickly identified as part of a visual lubrication program.

- Available in 10 colors
- Durable industrial material
- Makes grease fittings easy to find
- Easy to use - even when wearing gloves
- Supplied in bag of 100

**Custom Labels**

Available in same 10 colors and a variety of sizes and materials, including 10 different shapes - but customized for your applications. We can print the following information or leave it blank for you to hand write:
- Color
- Shape
- Manufacturer
- Product Name
- Viscosity
- Application
- Additional Information

Or we can create a custom label.

---

**Custom Lube Poster**

Hang these tailor made lube chart posters around the workplace for quick identification and color coding of lubricants. Helps to identify lubricants and prevent cross contamination. Large 24”x36” size makes it viewable from across the factory floor.

Part Number : FFP2436
Safety/Storage Cabinets

Safety Cabinets are ideal for fuels, solvents, and lubricant storage; a perfect compliment to your fluid management program. Available in various sizes with adjustable shelves gives you the versatility to store fluids to fit your requirements. Conforms to NFPA Fire Code No. 30 and OSHA standards.

- Constructed of 18-gauge steel.
- All welded, reinforced double wall construction with insulating air space to offer fire resistant protection.
- Leak proof 2” bottom pan prevents leakage from accidental spills.
- Adjustable galvanized steel shelves hold up to 350 lbs.
- Doors include 3-point latching device with key lock.
- Self closing door models feature a fusible link that melts when ambient temperature reaches 160°.
- Grounding wire connections standard to dissipate static electricity buildup.
- Screened flame arrester vents on both sides of cabinet with 2” threaded fittings for external exhaust and with fire baffle and cap.
- Leveling pads.
- Ships assembled.

Instantly organize your lubricant and equipment area with this high quality storage cabinet. Featuring bins and shelves for all of your lubrication and grease accessories.

- Tilt style bins inside cabinet doors swing forward to allow free access to contents, then tilt back for storage. Tilt bins supplied with removable dividers to provide maximum storage options.
- All welded, 14 gauge steel construction.
- Removable plastic parts bins easily clip on and off internal racks - bins are also stackable when not attached to cabinet.
- Flush mounted stainless steel door latch with key.
- Door casters beneath swing out door to support heavy loads on the large model cabinet.
- Ships assembled.

Spill Decks/Pallets

There’s no need to worry about incidental spills on your factory floor. These spill decks are easy to load with a low profile design and optional ramp. Each spill deck is designed for stand-alone use or can connect with other spill decks for using Link-Locks, for a customized work area.

- Tough, one piece polyethylene construction will not rust or corrode.
- Large sump capacity catches incidental spills.
- Removable heavy-duty structural form grates for easy cleaning.
- Rolled-edge design helps resist cracking and warpage.
- Doors include 3-point latching device with key lock.
- Ramp hooks onto spill deck for easy loading.
- Create a solid workspace using Link-Locks.

Spill pallets offer greater secondary containment to meet regulatory requirements. Raised edges on back and sides helps orient barrels on the pallet. Pallets are forkliftable and have removable grates for easy cleaning. Includes drain and plug.

The IBC Spill Pallet gives bulk container users more versatile spill containment. It fits more than 99% of all IBC dispensing units and features a large sump capacity of 385 gallons; more than exceeding EPA 40 CFR 264.175 regulations. The unit also comes with an integrated 5-gallon pail holder for quick and easy dispensing. A one-piece, light weight, 100% polyethylene IBC spill containment unit that is forkliftable and nestable for convenient shipment and storage and it reduces shipping costs. The polyethylene construction will not rust, corrode, or have adverse reactions with chemicals.

Customized Filtration Solutions for Many Applications

These fully customizable filtration systems offer workplace solutions for a variety of applications. Whether it is for prefiltering new oil, transferring oil, topping off reservoirs, dispensing new oil, filtering contaminated systems, or more - there is a configuration for you. These quality systems can be customized with different pumps, filters, hoses, connections, and colors.

Typical Applications:
- Filtering contaminated systems
- Flushing new or repaired systems
- Pre-filtering new oil
- Transferring oils
- Topping off reservoirs
- Collecting oil samples for analysis
- Dispensing new oil

STEEL TOTE CART
Frame Style: T3

FILTER CART
Frame Style: HT

TANDEM FILTER CART
Frame Style: TH

PLATFORM CART
Frame Style: PT
Tip: Each system is custom built to your specifications. It may take longer but you know you are receiving something you need. Plus, there are many options and ways to configure. Give us a call and we can help guide you.

### Frame Style
- DC: Drum Filter Cart
- D7: Drum Tapper (Uses the Y series head)
- FPA: Aluminum Diamond Plated, FilterPak (Single D series head)
- UFPA: Ultra-lightweight, Aluminum Framed FilterPak (Single M series head)
- HT: Filter Cart
- PU: Panel Unit
- T3: 30 Gallon, Steel Tote Cart
- TH: Tandem Filter Cart
- PT32: Platform Cart w/ 32 gal Poly Tank
- PT3232: Platform Cart w/ 2 ea 32 gal Poly Tanks
- PT71: Platform Cart w/ 71 gal Poly Tank
- PT115: Platform Cart w/ 115 gal Poly Tank
- ZC: Special Filter Cart Construction
- Y: Compact, Low Pressure, Aluminum Heads
- DB: Medium Pressure, Cast Aluminum Heads
- M: Low Pressure, Aluminum Heads
- NF: No Heads
- ZF: Special Heads

### Y Series Filters (Only used with the Drum Tapper)
- 3: 3" x 8", 3 Micron Filter Element, P3=1000
- 5: 3" x 8", 5 Micron Filter Element, P3=1000
- 7: 3" x 8", 7 Micron Filter Element, P3=1000
- 12: 3" x 12", 12 Micron Filter Element, P3=1000
- 22: 3" x 22", 22 Micron Filter Element, P3=1000
- WR: 3" x 8", Water Removal Element
- NE: No Element

### M Series Filters (Only used with the M series Heads)
- 3: 5" x 10", 3 Micron Filter Element, P3=5000
- 5: 5" x 10", 5 Micron Filter Element, P5=5000
- 7: 5" x 10", 7 Micron Filter Element, P7=5000
- 10: 5" x 10", 10 Micron Filter Element, P10=5000
- 25: 5" x 10", 25 Micron Filter Element, P25=5000
- WR: 5" x 10", Water Removal Element
- NE: No Element

### D Series Filters (Only used with the D series Heads)
- 4: 5" x 14", 4 Micron Filter Element, P4=4000
- 7: 5" x 14", 7 Micron Filter Element, P7=4000
- 10: 5" x 14", 10 Micron Filter Element, P10=4000
- 25: 5" x 14", 25 Micron Filter Element, P25=4000
- WR: 5" x 14", Water Removal Element
- NE: No Element

### Y Series Filters (Only used with the Drum Tapper)
- 3: 3" x 8", 3 Micron Filter Element, P3=1000
- 5: 3" x 8", 5 Micron Filter Element, P5=1000
- 7: 3" x 8", 7 Micron Filter Element, P7=1000
- 12: 3" x 12", 12 Micron Filter Element, P12=1000
- 22: 3" x 22", 22 Micron Filter Element, P22=1000
- WR: 3" x 8", Water Removal Element
- WR: 3" x 5", Water Removal Element
- NE: No Element

### M Series Filters (Only used with the M series Heads)
- 3: 5" x 10", 3 Micron Filter Element, P3=5000
- 5: 5" x 10", 5 Micron Filter Element, P5=5000
- 7: 5" x 10", 7 Micron Filter Element, P7=5000
- 10: 5" x 10", 10 Micron Filter Element, P10=5000
- 25: 5" x 10", 25 Micron Filter Element, P25=5000
- WR: 5" x 10", Water Removal Element
- NE: No Element

### D Series Filters (Only used with the D series Heads)
- 4: 5" x 14", 4 Micron Filter Element, P4=4000
- 7: 5" x 14", 7 Micron Filter Element, P7=4000
- 10: 5" x 14", 10 Micron Filter Element, P10=4000
- 25: 5" x 14", 25 Micron Filter Element, P25=4000
- WR: 5" x 14", Water Removal Element
- NE: No Element

### Power Source/Pump
- 115v, 60Hz, 1HP++
- 115v, 60Hz, 1/2 HP
- 115v, 60Hz, 1/4 HP (Only available on the FilterPak and Drum Tapper units)
- Three Phase, 230/480v
- Air Motor (Filter, Lubricator & Regulator Included)
- Variable Speed
- Special Power Source
- 1 GPM
- 2 GPM
- 5 GPM
- 10 GPM
- Special Pump Option
- No Hoses
- 71ft clear, PVC Hose (3/4" Suction & 1/2" Discharge)
- 71ft clear, PVC Hose (1" Suction & 3/4" Discharge)
- 71ft Black Hydraulic Hose (3/4" Suction & 1/2" Discharge)
- 71ft Black Hydraulic Hose (1" Suction & 3/4" Discharge)
- Special Hose Type and/or Length
- CamLock Connectors
- Threaded Ends
- 3/4" & 2" ISO B Quick Disconnects w/ Steel Dust Plugs
- 1" & 3/4" ISO B Quick Disconnects w/ Steel Dust Plugs
- 3/4" & 1/2" Flush Face Quick Disconnects w/ Steel Dust Plugs
- 3/4" & 1/2" Flush Face Quick Disconnects w/ Steel Dust Plugs
- Hose Wands
- No Connections
- Special Connections
- No Cord
- 4ft Electric Cord
- 8ft Electric Cord
- 40ft Retractable Cord Reel
- 26ft Electric Cord
- Special Cord Type or Plug
- Blaze Orange
- Red
- Blue
- Black
- Yellow
- Silver
- Special Color
- High Oil Temperature Alarm
- Manual Bypass Valve
- Digital Flow Meter/Totalizer
- Color Coded Delta P Gauge
- Visual Flow Meter
- Lift Lugs
- Magnetic Pre-Filer w/ Cleanable Rod
- Heat Exchanger (Air/Oil or Water/Oil)
- Push Button Sample Ports
- Standard Minimix Sample Ports
- Inline Particle Counter
- YStrainer (3/4" mesh)
- On/Off Timer Control
- Water Content Monitor (For use with the Particle Counter)
- Yellow Light Filter Indicator
- Solid Rubber Tires
- No Flat, 13" Tires
- Special Features and/or other Options not listed
Paper Funnel
Disposable funnel made from a coated, heavy grade paper stock that can be used with virtually any liquid or powder. Eliminates contamination and ready to use.

- Mini, 5” x 2.4” pack of 25: FF05-0120
- Standard, 5.6” x 2.75” pack of 36: FF01-0132
- Professional, 9” x 4.25” pack of 36: FF03-0140
- Extended, 16.3” x 3.5” pack of 10: FF04-0120

Rotary Barrel Pump
This heavy duty rotary barrel pump has an aluminum die cast body and includes a 2” cast iron bung adaptor and die cast aluminum handle with security locking latch.
- Complete with a 3 pc threaded suction tube for use on 15 gallon (50 liter) - 55 gallons (205 liter) barrels.
- Recommended for use with lubricating oils up to SAE 30, gasoline, diesel fuel, and kerosene.
- 1.8 m PVC nitrile delivery hose with metal nozzle, spring, and hose clamp.
- Delivers 1 liter for 12 strokes.
- Do not use with corrosive liquids, solvents, acids, alkalis, and similar liquids. Never operate the pump near fire or source of spark.

Part Number : 950020

Lever Action Barrel Pump
Designed to fit containers ranging in size from 15 gallon (50 liter) through 55 gallon (205 liter), this popular lever action pump is engineering for industrial use.
- A plated steel lever handle with rubber grip for convenience.
- Built in 1.5” and 2” bung for use on drums with either opening.
- Premium power coated steel pump body with ribber section aluminum die cast pump head for maximum strength.
- Curved metal spout and telescopic suction tube.
- With a non return viton seal the pump can also be used with anti-freeze, solvents, thinners, automotive additives, industrial chemicals, and other non corrosive liquids. It is not suitable for water based fluids, gasoline, and corrosive fluids.

Part Number : 950000

Drum Opener
An easy and convenient tool to open almost all types of drums. Ends of the wrench are designed to fit perfectly onto most 2” and 3/4” drum plugs. Made of cast aluminum, hardened and tempered for increased strength.

Part Number : 950150
New oil isn’t as clean as you think.

Studies show that new oil is simply not clean enough for today’s modern equipment. Unless your lubricant supplier is giving you a certificate that guarantees the level of cleanliness, it isn’t without impurities. Fortunately, it is easy to clean. Using a ForFluids.com bulk storage system with certain configurations will clean your fluid coming in AND going out.

**SPCC Guidelines**

The Oil Pollution Prevention regulation, under the authority of the Clean Water Act, sets forth requirements for prevention of, preparedness for, and response to oil discharges at specific non-transportation related facilities. To prevent oil from reaching navigable waters and adjoining shorelines, and to contain discharges of oil, the regulation requires these facilities to develop and implement SPCC plans, establish procedures, methods, and equipment requirements.

There are a lot of different guidelines and regulations for the EPA’s SPCC rule and further information can be found online at: [www.epa.gov](http://www.epa.gov)
NEW LUBE ROOM DESIGN

GOALS:
* Be Organized
* Eliminate errors!
* Safer and CLEANER

Tip: Label cabinets and shelves for their intended purpose. This way your layout will be more accurate for your needs.

call ForFluids.com to order: 1-630-852-1734
bulk system with (4) 65g tanks
bulk system with (2) 120g tanks
bulk cabinet for storing drums and lids and other goodies.

Tip: Sometimes it’s not a “lube room”, but a “lube area”. Keeping the area organized and clean will say a lot about the organization and its operations.

Tip: Try to draw it to scale as much as possible. Depending on the size of your room, one square equals one foot, if you have a smaller room then two squares for one foot.

bulk system (2) 120g tanks
bulk system (1) 120g tank (2) 65g tanks
Lube Center Control Panels with Hose Reels
bulk system (4) 65g tanks

Tip: Sometimes it’s not a “lube room”, but a “lube area”. Keeping the area organized and clean will say a lot about the organization and its operations.

Tip: Try to draw it to scale as much as possible. Depending on the size of your room, one square equals one foot, if you have a smaller room then two squares for one foot.

bulk system (4) 65g tanks
bulk system (2) 65g tanks
bulk cabinet for all of our stuff
Use this key as a guide if you are assigning each square as 1 foot.

- **Cabinet**
  - For storing supplies, labeling, new containers, and other items. Ranges from 36"-40" wide and 21"-37" deep.

- **Safety Cabinet**
  - For fuels, solvents, and lubricants that need to be in a special cabinet.

- **Bulk Storage Station**
  - Available in a variety of configurations. Typically can hold 1 to 4 tanks depending on the tank size. It has 2 shelves and each shelf can hold either 2-45 gallon tanks or 1-120 gallon tank. Or for larger operations, a pod can hold 1-240 gallon tank. To help determine needs, write the number of tanks - for example, "B4" is Bulk System with 4 tanks.

- **Dispensing Station**
  - (Only for the Lubrication Work Center System)
  - The Dispensing Station for the Lubrication Work Center is where all the dispensing taps and controls are located.

- **Tote Dispensing Station**
  - Sometimes you have lubricants in larger quantities, and if it arrives in totes we have a perfect solution.

- **Bulk Storage Cabinet**
  - Cabinet has the same dimensions as the Bulk Storage Stations for large capacity storage of lubrication tools and parts.

- **55 Gallon Station**
  - (with 55 gallon drum pictured - not included)
  - Often times this system is located in another part of the facility nearby a "high use" area. Usually the 55G drum on a spill deck is along side the system. More than one drum can be nearby 'at the ready' since the hose with the drum station will reach out.

- **Spill Deck or Pallet**
  - Available in a variety of sizes

- **Filter / Dispensing Cart**
  - Can range in sizes depending on application and options. Filter carts are just for filtering fluid while the dispensing carts are for filtering and dispensing fluid around your facility.

- **Shelf**
  - For storing all the stuff you buy from ForFluids.com

</tbody>
</table>

If you have more than 10 lubricants that need colors, no problem, we have you covered. We can create a custom labeling system that includes shapes such as diamonds, squares, and triangles to help organize lubricants.

Oil safe storage and container systems have 10 different colors. Color coding will help simplify dispensing and help eliminate errors.

Oil safe storage and container systems have 10 different colors. Color coding will help simplify dispensing and help eliminate errors.
Tip: Additional space may be needed depending on options such as hose reels. Also leave extra space around equipment for getting to power outlets.
